

WHY USE ALLERGUARD?

PROPERTY	BENEFIT
Eliminates dust mites and droppings	Starves existing mites in divan base, mattress, pillow or duvet – unable to get to food sources through the material.
Protect new beds and bedding from dust mites	Stops colonisation of dust mite in new beds and bedding.
Restricts bed bugs from hiding in mattress and other bedding	Provides impenetrable barrier for bed bugs to find a safe place to live.
Eliminates bed bugs	Any bed bug trapped within the microfiber cover will die as they cannot bite their way through the fabric, unlike other materials like cotton.
No need to replace beds after infestation of bed bugs	Make considerable saving by using AllerGuard covers instead of replacing beds and bedding
No use of pesticide impregnation in the material of the fabric	All covers free from potentially harmful chemicals. Particularly friendly for guests who suffer from allergies and asthma.
Protects bed and bedding from penetrating allergens	AllerGuard microfiber weave is so tight that it stops pollen, cat allergens, fungal and bacteria spores from being absorbed into beds and bedding.
Contains allergens associated with feather and goose down products	Protects guests from feathers and feather dust as they cannot slip through the protective AllerGuard material encapsulating pillows and duvets
Supports fire safety in bedrooms	Microfiber material passed: Ignitability of Bedding BS EN ISO 12952:2010 part 1, under UKAS testing conditions.
Improved transpiration of moisture	Horizontal capillary action allows covers to permeate moisture more quickly than other more traditional materials like cotton.
Protects bed and bedding from many penetrating smells	Limits absorption of many household smells in beds and bedding as they cannot penetrate the microfiber material. Cannot protect against cigarette smoke absorption
Allows normal airflow through the material	AllerGuard covers allow movement of air and breathing to happen like any other bedding materials.
Prolongs life of beds and bedding	Cost of removable covers is more cost effective than replacing a bed or bedding.
Brings a new lease of life to existing beds and bedding	Commonly described as “manmade silk” the microfiber material present existing beds and bedding with an extended life.
No need to employ specialist team of fitters	Your staff can easily fit AllerGuard products so there is no need to pay for specialist fitters.

Manage bedding portfolio more efficiently	By using AllerGuard interliners on every feather or goose down pillow or duvet offered to guests (as part of a selection) protects allergy sufferers when mistakes periodically arise.
Supports high quality bed and bedding products	Combine luxurious comfort with guaranteed all round protection from dust mites, bed bugs and other allergens when AllerGuard is adopted.
Product claims backed by internationally recognised bodies	AllerGuard microfiber material tested to Oeko - Tex® Standard 100 for harmful substances. Recognised as a medical device by Danish Health and Medicines Authority. Recommended by the Danish Asthma and Allergy Association.
No minimum order requirement	Order AllerGuard products to match a phased introduction to suit your budget. No minimum order requirement and discounts for specific capital spend apply.
No substitute for sheets and pillow cases	AllerGuard covers are meant to be used in conjunction with traditional hotel bedded.
Machine washable	All AllerGuard products are machine washable. Manufacturer's instructions are recommended.
Need to replace pillows and duvets	AllerGuard also manufacture a range of high specification pillows and duvets covered in microfiber material. No need to spend any more money on the protection of bedding.
Good for all sleepers	Contributes significantly to all guests having a good night's sleep

ONE DAY EVERY GOOD HOTEL WILL PROTECT THEIR GUESTS WITH ALLERGUARD
